Price	: IDR 4,300,000,000

Property Detail

Breathtaking Freehold Land in Kodi Beach, Sumba

Situated on the Western Coast of Sumba, this 115are block of land is on literally on the amazing White Sandy beaches of Kodi.

The infrastructure for a watersource and for electricity is installed and there is an access road to the land.

On the western edge of the Savu Sea, a few islands east of Bali, there is a place where wild horses still roam on palm-fringed beaches and stretches of road see more buffalos than cars. An island of shadow-draped natural pools and mythical surf breaks, but also dry swathes of limestone hills that feel almost like African savannah. The most defining aspect of Sumba—around twice the size of Bali, but with barely a sixth of its population—is its Indigenous Marapu belief system, in which locals worship the spirits of their ancestors, whom they believe live all around them, though some are buried in imposing megalithic tombs. In kampung villages of thatched, pointy-roofed homes, betel-nut-chewing women spin some of Indonesia's most elaborate ikat fabrics—geometric patterns of seashells and animals, on fabric hand-dyed with indigo leaves, root bark, and pounded turmeric.
